

Product Specification

Triple Basin Processing Sink

Product Description

A three basin, all stainless, processing sink with options for basin size, sonic basin, faucets, guns, drain types, side splashes and fixed or adjustable height function.

Application

Used in Sterile Processing decontamination area to perform pre-cleaning for instruments, containers and other related items.

Standard Features

Construction/Design

- Type 300 stainless construction.
- 12" high integrated backsplash with sloped top and mounting holes for faucets and accessories
- Solid sink deck, with no mounted accessories, for easy cleaning
- Sloping drain board on each side
- No-drip marine edge on sink deck
- Basins are etched with water levels indicating gallons

Dimensions

- Fixed Height Sink - 120" W x 30" D x 37" H
- Adjustable Height Sink - 120" W x 30" D x 34" to 42" H

Basin Width Options

- 24" W x 17" D x 10" H
- 30" W x 17" D x 10" H

Benefits

Rinse and Fill Faucets

Sink can be configured with up to two faucets. Pre-rinse/Gooseneck combination faucet and a gooseneck only faucet are available. All faucets mount to the backsplash. Pre-rinse/Gooseneck combo faucets also include a clamp to secure the faucet to the wall or pegboard.

DI Faucet

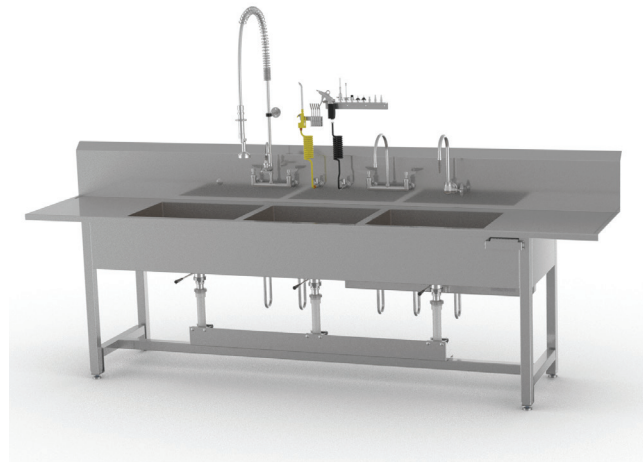

An ON/OFF knob controlled, tin-lined, DI faucet is available. Mounts to the backsplash.

Air and Water Guns

Air and water guns, both with coiled hoses, hooked body design, tips and wall or pegboard mounting brackets are available. Both gun connections mount to the backsplash.

Drain

Drain is available as standard strainer type and lever operated. PVC tailpiece included with fixed height units. Drain piping is included for adjustable height sinks and can be specified as either copper or PVC.

Side Splashes

10" high side splash available for right side, left side or both sides.

Ultrasonic Basin

One basin can be configured as an ultrasonic cleaner, for either the 24" or 30" wide basins. The ultrasonic power generator is located under the right-hand drain board. A simple knob is used for setting sonic on time. This option requires the use of lever drains.

Adjustable Height Control Panel

When configured as an adjustable height unit a small control panel is mounted, on the front, under the right-hand drain board. The panel controls up and down movement and allows for up to 4 user settable heights.

Pegboard & Accessories

A full length, stainless steel, pegboard, with ¼" holes on a 1" pattern is available. A full portfolio of accessories are available and can be added at any time.

Utilities / Installation Requirements

Reference cut sheet for utilities and installation requirements.
